IR-4 FIELD DATA BOOK

PART 9. WEATHER AND IRRIGATION RECORDS

A. DAILY FIELD TRIAL WEATHER RECORDS

INSTRUCTIONS: Document field trial weather records by manually collecting information or by providing computer generated records. Weather records are required from the date of planting or transplanting of annual crops into the test plot(s), or for a minimum of one month prior to the first application onto perennial crops, until last residue sample collection. If the protocol requires that transplants are treated with the test substance prior to transplanting, then weather records are required from the date of seeding. If transplants are used for an IR-4 trial but no test substance applications are made prior to the transplanting, then temperature/humidity records are NOT required for the period prior to transplanting. Weather records that are collected manually must be recorded directly on this (or equivalent) forms daily. Document computer generated weather data by placing the original or true copy of the data printout directly behind this page. Whether manually recorded or computer-generated, please indicate the approximate time of day that weather data were collected. Be sure to date and initial all entries. Greenhouse Trials: Document daily min/max temperatures and daily min/max humidity.

B. ADDITIONAL METEOROLOGICAL INFORMATION							
WERE THE TEST PLOTS IRRIGATED? (Check one) YES NO							
TYPE OF IRRIGATION (e.g., drip, flood, overhead sprinkler)							
IRRIGATION WATER SOURCE (e.g., canal, well)							
IF THE TEST PLOTS WERE IRRIGATED, DESCRIBE HOW THE DAILY AMOU	NTS WERE DETERMINED:						
IF IRRIGATION DATA ARE PLACED IN THIS FIELD DATA BOOK IN A SECTION.	ION OTHER THAN PART 9*,						
INDICATE HERE THE PART AND PAGE NUMBERS WHERE THE DATA ARE *Excluding the "first irrigation after application" entries in Part 6.	FOUND: PART PAGES						

WERE THERE ANY SEVERE WEATHER EVENTS DURING THE TRIAL? (Che	ck one) YES NO						
Severe weather events include damaging hail, hard frosts, tropical storms, excessive rewinds, even if such events are not considered unusual in the location of the trial.	ain and unusually prolonged or high						
INSTRUCTIONS: IF THE WEATHER HAS BEEN ASSESSED AS <u>NOT</u> NORMAL OR OCCURRED, then assess the impact on the crop in the test plots for this trial. Note we or low, and whether precipitation was unusually heavy or light, during the growing see unusual or severe weather events. Do not list below the differences from the monthly these differences are indicative of truly abnormal weather.	hether temperatures were unusually high ason of the crop, and include the dates o
