INSERT ADJUVANT LABELS, CERTIFICATE(S) OF ANALYSIS, MSDS/SDS (optional), AND OTHER SUPPORTING DOCUMENTS RECEIVED WITH THE TEST SUBSTANCE AFTER THIS PAGE. PAGINATE THEM WITHIN PART 4.

Preferred order of insertion*:
- Adjuvant label
- Test substance MSDS/SDS (optional)
- Test substance shipping documents
- Test substance COA(s)

*This is not a required order. If documents have been inserted in a different order and paginated, it is not necessary to re-arrange and re-paginate them.

The test substance label, if received from the supplier, does not need to be included in the Field Data Book, but it must be accessible to the field personnel during applications and to the QA auditor during a critical phase inspection. The label may be kept in a separate folder or notebook than this Field Data Book. The MSDS/SDS may be kept with the label, or it may be placed in Part 10 of this Field Data Book (so that it does not have to be paginated).
